Performance data represents past performance and does not guarantee future results. The investment return and principal value of the investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the data quoted. Performance figures assume reinvestment of all dividends and capital gains. For performance data as of the most recent month-end, please visit bairdfunds.com.

INVESTMENT PHILOSOPHY

The Baird Small/Mid Cap Growth Fund is a high conviction portfolio of 60-70 stocks, with a strong emphasis on fundamental, bottom-up research to discover unique, secular growth stories that we believe can drive above average sales and earnings growth. The team strongly believes in having a true "smid" portfolio invested in companies primarily between \$500 million and \$12 billion in market cap. The primary investment goal is to provide superior-to-market returns over a 3-5 year time horizon versus the Russell 2500 Growth Index. The team does this by finding companies for inclusion in the portfolio that have stronger growth, more favorable industry dynamics and competitive positioning, and the opportunity to expand profit margins.

INVESTMENT STRATEGY

The Fund normally invests at least 80% of its net assets in common stocks of companies with small and medium market capitalizations. Although the Fund principally invests in U.S. companies, the Fund may invest up to 15% of its total assets in equity securities (consisting of common stocks, ordinary shares and ADRs) of foreign companies that are traded on U.S. exchanges. When analyzing equity securities to be purchased by the Fund, the Advisor emphasizes a company's growth prospects. The Fund's investments are selected using a variety of both quantitative techniques and fundamental research in seeking to maximize the Fund's expected return while controlling risk.

Investors should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. This and other information can be found in the prospectus or summary prospectus. A prospectus or summary prospectus may be obtained by visiting bairdfunds.com. Please read the prospectus or summary prospectus carefully before investing.

The performance of Baird Small/Mid Cap Growth Fund is measured against the Russell 2500 Growth Index. The Russell 2500 Growth Index measures the performance of those Russell 2500 companies with above average price-to-book ratios and higher forecasted growth values. When sorted by market cap, the Russell 2500® Index consists of all of the companies in the Russell 3000® Index, except for the 500 largest companies by market capitalization in that index. The Russell Indices are a trademark of the Frank Russell Company. Indices are unmanaged and direct investment is not possible.

The fund focuses on small- and mid-cap growth style stocks and therefore the performance of the Fund may be more volatile than the performance of funds that focus on types of stocks that have a broader investment style. The fund may invest up to 15% of its total assets in U.S. dollar denominated foreign securities and ADRs. Foreign investments involve additional risks such as currency rate fluctuations and the potential for political and economic instability, and different and sometimes less strict financial reporting standards and regulation.

The Morningstar Style Box is a proprietary nine-square grid that provides a graphical representation of the "investment style" of stock funds. It classifies securities according to market capitalization (the vertical axis) and growth and value factors (the horizontal axis). By providing an easy-to-understand visual representation of fund characteristics, the Morningstar Style Box allows for informed comparisons and portfolio construction based on actual holdings, as opposed to assumptions based on a fund's name or how it is marketed. The Style Box also forms the basis for Morningstar's style-based fund categories and market indexes.

Profit margin is a ratio of profitability calculated as net income divided by revenues, or net profits divided by sales. **LT Debt/Capital ratio** is a measurement of a company's financial leverage. **Revenue Growth** is the total of operating revenues less various adjustments to gross sales. Revenue Growth does not include outliers defined by companies with Revenue Growth less than -50% and greater than 300%. **P/E ratio** is a valuation of a company's current share price compared to its expected per-share earnings. The holdings, characteristics and statistical measures used in this fact sheet are not a forecast of the fund's future performance and are subject to change. Specific securities identified do not represent all the securities purchased, sold or held and a reader should not assume these securities were or will be profitable.

Baird Funds are offered through Robert W. Baird & Co., a registered broker/dealer, member NYSE and SIPC. Robert W. Baird & Co. also serves as investment advisor for the Fund and receives compensation for these services as disclosed in the current prospectus.
