<b>Beta</b>	0.95	1.00	0.98
<b>Expense Ratio*</b>	0.80	N/A	1.06

<sup>1</sup>The Morningstar Overall Rating™ for funds is calculated for managed products with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. The Baird Mid Cap Growth Fund (Institutional Class) was rated 4 stars out of 534 funds; 4 stars out of 499 funds; and 3 stars out of 389 funds in the Mid-Cap Growth category for the 3-, 5- and 10-year periods, respectively Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures. Morningstar Rating is for the share class listed only; other classes may have different performance characteristics.

<sup>2</sup>The Morningstar Percentile Rank is based on the fund's total return relative to all funds in the US Mid Cap Growth category for the period. The highest (or most favorable) percentile rank is 1%, and the lowest (or least favorable) percentile rank is 100%. Morningstar total returns include both income and capital gains/losses and excludes sales charges.

Investors should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. This and other information can be found in the prospectus or summary prospectus. A prospectus or summary prospectus may be obtained by visiting bairdfunds.com. Please read the prospectus or summary prospectus carefully before investing.

The performance of Baird Mid Cap Growth Fund is measured against the Russell Midcap Growth Index. It measures the performance of those Russell Midcap companies with higher price-to-book and higher forecasted growth values. Indices are unmanaged and direct investment is not possible. Lipper Mid-Cap Growth funds will normally have an above-average price-to-earnings ratio, price-to-book ratio, and three-year earnings growth figure, compared to the U.S. diversified mid-cap funds universe average.

The Fund focuses on mid-cap growth style stocks and therefore the performance of the Fund will typically be more volatile than the performance of funds that focus on types of stocks that have a broader investment style. The fund may invest up to 15% of its total assets in U.S. dollar denominated foreign securities and ADRs. Foreign investments involve additional risks such as currency rate fluctuations and the potential for political and economic instability, and different and sometimes less strict financial reporting standards and regulation.

<sup>3</sup>Source: Morningstar Direct. Percentile rankings are for the Institutional Share Class of the Fund and based on a comparison to the 560 funds in the Morningstar Direct US OE Mid Cap Growth category. **Beta** is a measure of the fund's volatility relative to the market, as represented by the stated index. A beta greater than 1 indicates volatility greater than the market; beta less than 1 is less volatile than the market. **Information Ratio** is a measure of portfolio management's performance against risk and return relative to the benchmark. **Sharpe Ratio** is a measure of historical adjusted performance calculated by dividing the portfolio's excess returns (average monthly returns minus the average monthly return of the Citigroup 3-month Treasury bill benchmark) by the standard deviation of those returns. The higher the ratio, the better the portfolio's return per unit of risk. The **Upside Capture Ratio** is used to evaluate how well an investment manager performed relative to an index during periods when the index has risen. The **Downside Capture Ratio** is used to evaluate how well or poorly an investment manager performed relative to an index during periods when that index has dropped.

Fund Characteristics Table Source: FactSet. **Profit Margin** is a ratio of profitability calculated as net income divided by revenues, or net profits divided by sales. Specific securities identified do not represent all the securities purchased, sold or held and a reader should not assume these securities were or will be profitable. **Debt/Capital Ratio** is a measurement of a company's financial leverage. Debt/Capital Ratio does not include outliers defined as companies with Debt/Capital greater than 500%. **Revenue Growth** is the total of operating revenues less various adjustments to gross sales. Revenue Growth does not include outliers defined as companies with Revenue Growth less than -50% and greater than 300%. **P/E Ratio (Forward 12 month)** is a valuation of a company's current share price compared to its expended per-share earnings.
